

LBM Manual for the EPA Renovation, Repair and Painting Rules

The Mid-America Lumbermens Association has compiled a notebook as an informational tool for retail lumber and building material dealers to assist them in understanding the implementation requirements of the EPA Renovation, Repair and Painting Rule effective April 22, 2010. The Act calls for training, administrative oversight and a protocol for handling lead-based paint in renovation and repair of pre-1978 homes.

This is by no means a complete breakdown of all the components of this program as the entire Act is a 77-page document in the *Federal Register* (included in the notebook). Our goal is to present the key provisions and provide a roadmap for you to understand the basics. We at MLA hope you find the information useful.

To obtain a copy of the manual, simply complete and return this form. It is available for just \$49.95 plus shipping. We will send an invoice to you with the manual. Please call Art Brown at MLA with any questions at 800-747-6529. (*Nonmember price is \$79.95 plus shipping.*)
