

# Take the Mystery Out of OSHA Compliance!

***OSHA Consultation Services – A New Service for Members Exclusively from MLA!***

MLA now provides OSHA consultation services including:

- Safety, health and ergonomic hazard assessment;
- Recommendations to control and eliminate hazards;
- Written program evaluation;
- Hands-on training on health and safety topics; and
- Safety and health program assistance.

The benefits for your business:

- Fewer accidents;
- Lower injury and illness rates;
- Decreased workers' compensation costs;
- Increased employee morale; and
- Fewer product losses.

A consultation will include:

- Personal, confidential, professional and relevant assistance specific to your business;
- Guidance on effective safety meetings and safety committees;
- Answers to questions about OSHA standards and procedures; and
- A consultant to present program information at safety-related forums such as meetings, training, business seminars or safety/health conferences.

Your consultant will NOT issue citations for violations of OSHA standards or provide other businesses with information about your participation, hazards or business processes.

We WILL work with you so your workplace will “pass” an OSHA inspection.

When you request an OSHA consultation, you will receive a report listing the hazards identified along with recommendations for corrections. MLA encourages you to correct the hazards to make your worksite a safe place for your employees. If a consultant identifies an “imminent danger” situation, the employer should take immediate action to protect all employees.

**Contact MLA today for more information – 800-747-6529 or [ruhler@swassn.com](mailto:ruhler@swassn.com).**
