Spring 2017 | Now enrolling!

Second 8 Weeks | March 20-May 12

CNST 103 Construction Materials and Methods II
Sedalia | MW 9-10:25 a.m.

Lake of the Ozarks | T 7:30-10:15 a.m.

Provides a basic knowledge of methods and materials historically and currently in use in the construction industry, as well as potential future developments in technology. Course is designed to address the first eight major areas of construction materials and methods as detailed in Construction Specification Institute format.

CNST 138 Construction Planning and Scheduling
Sedalia | TR 1-2:25 p.m.

Discusses methods of organizing work items associated with a construction project into a logical sequence of optimizing efficiency and profitability. Manual and computerized scheduling methods are used in developing project schedules for both real and simulated projects.

CNST 162 Construction Safety
Online | Arranged

Discusses job safety and best practices as they pertain to the construction industry. A general philosophy of safety awareness is achieved through study of specific hazards and case studies. Students learn to navigate OSHA regulations as well as legal implications on the construction industry, and they may earn the OSHA 10-hour card.

Each course is three credit hours.
